☐ Additional inventors are being named on separately numbered sheet(s) attached hereto.

The above identified prior application in which no payment of the issue fee, abandonment of, or termination of proceedings has occurred, is hereby expressly abandoned under 37 CFR 1.62(g) as of the filing date of this new application. Please use all the contents of the prior application file wrapper, including the drawings, as the basic papers for the new application. (No new specification is required, 37 CFR 1.62(e).) (Note: 37 CFR 1.60 may be used for continuation or divisional applications where the prior application is not to be abandoned.)

- ☐ Enter the unentered amendment previously filed on \_\_\_\_\_ under 37 CFR 1.116 in the prior application.
- ☒ A preliminary amendment is enclosed.
- ☐ This application is being filed by less than all the inventors named in the application. The Commissioner is requested under 37 CFR 1.62(a) to delete the names of the following person or persons from the prior application who are not inventors of the invention being claimed in this application:

PRELIMINARY AMENDMENT

Sir:

Please amend the application as follows:

IN THE CLAIMS

Please add the following claims:

34. In combination, a hybrid motor vehicle comprising:

an electric motor connected to a first pair of wheels:

a cruise mode control circuit having preprogrammed cruise mode operating conditions, said control circuit automatically activating first coupling means for connecting a combustion engine to a second pair of wheels during a cruise mode on condition and deactivating said first coupling means during a cruise mode off condition, and said control circuit activating second coupling means for connecting said combustion engine to an electric generator for charging a battery during the cruise mode off condition;

said combustion engine running in an optimum mode at substantially constant speed and power output level.

35. The combination according to claim 34 wherein said cruise mode off condition for charging a battery comprises a speed less than a predetermined value.

36. The combination according to claim 34 wherein in the event of an inoperable electric power condition under cruise mode off condition, said combustion engine is connected by said first coupling means to said second pair of wheels.

37. A controller of a hybrid electric vehicle having an engine (22) and a motor (12) for controlling driving of the engine(22) and the motor(12), comprising:

a battery(58) for supplying electric power to the motor(12)  
motor-generated driving force transfer means(14) for transferring the driving force generated by the motor(12) to wheels(18);

a power generator(78) driven by the engine(22) to supply generated electric power to the battery(58);

engine-generated driving force transfer means(75) for transferring the driving force generated by the engine(22) to the wheels(28);

means for detecting a vehicle running state(44);and

control means(30) for controlling whether to transfer a driving force generated by an engine(22) to a power generator(78) or wheels(28) in accordance with a vehicle running state, wherein the control means(30) transfers the driving force generated by the engine(22) to wheels(28) when said running state is more than a predetermined value, transfers the driving force generated by the engine(22) to the power generator(78) when said running state is less than a predetermined value.

38. A controller according to claim 37 wherein said control means(30) sets a period for transferring driving forces generated by the engine(22) to wheels(28) when said running state changes from a value less than a predetermined value
